DISSEMINATION

TWO MULTIPLIERS EVENTS take place during the project.
These events allow the project partners to present the results and deliverables of the project. They are expected to attract a wide audience of stakeholders, including students and students' associations and representatives, staff involved in internationalisation /sustainability in higher education institutions, staff from the European Commission's Directorate General for Education Youth, Sport and Culture (DG EAC) and Erasmus+ National Agencies, .

THE FIRST EVENT took place online on 7 JUNE 2022, organised by Erasmus University Rotterdam.
For more information on the programme, PLEASE VISIT THIS PAGE.

THE SECOND MULTIPLIER EVENT will be be organised by the Erasmus Student Network in Brussels on 21 OCTOBER 2022.
For information and registration, PLEASE VISIT THIS PAGE.
The location has been chosen in order to make our second and last multiplier event more attractive towards the first target group of our project - European policy makers - as the headquarters of the European Commission are in Brussels. Partners will be able to present and discuss the handbook, guidelines and policy recommendations and to debate the changes that could be introduced in the Erasmus programme to make it carbon neutral. Participants to the conference will walk out with a clear understanding of the carbon footprint generated by the current Erasmus+ programme, the carbon

scenarios for the future programme, the possible solutions on the table, and the steps needed to translate them into policy actions.
